

## Html 2.5

### HTML img Tag Definition and Usage

The <img> tag defines an image in an HTML page.

The <img> tag has two required attributes: src and alt.

Note: Images are not technically inserted into an HTML page, images are linked to HTML pages.

The <img> tag creates a holding space for the referenced image

Example

```
<html>
<body>
<img src='smiley.gif' alt='Smiley face'
width='42' height='42'>

</body>
</html>
```

Default CSS Settings inMost browsers will display the  
<img> element with the following default values:

Example

```
<html>
<head>
<style>
img {
display: inline-block;
}
</style>
</head>
<body>
<p>An img element is displayed like this:
</p>
```

```
<p>Some text <img src=smiley.gif alt=Smiley face width=42 height=42> some text.</p>
```

```
<p>Change the default CSS settings to see the effect.</p>
```

```
</body>
</html>
```
