Html 2.2

HTML Paragraphs
The HTML <p> element defines a paragraph:
  Example

<p>This is a paragraph.</p>
<p>This is another paragraph.</p>

Note: Browsers automatically add some white space (a margin) before and after a paragraph.

HTML Display
You cannot be sure how HTML will be displayed.

Large or small screens, and resized windows will create different results.

With HTML, you cannot change the output by adding extra spaces or extra lines in your HTML code.
The browser will remove any extra spaces and extra lines when the page is displayed:

  Example

<p>This is a paragraph.</p>
<p>This is another paragraph.</p>

    HTML Line Breaks
The HTML <br> element defines a line break.

Use
if you want a line break (a new line) without starting a new paragraph:

  Example

<p> This is
a paragraph
with line breaks.</p>
The <br> tag is an empty tag, which means that it has no end tag.

The HTML <pre> Element
The HTML <pre> element defines prefor
